## Technical Manufacturing Initiative

Bringing engineering to life through transformation, modernization and re-industrialisation

**GTMI** is a non-profit organisation established by the Gauteng Department of Economic Development (GDED). It is one of the Gauteng Provincial government initiatives intended to create jobs in support of the Government's industry development strategies. GTMI executes this mandate by generating innovative technical manufacturing techniques to Transform, Modernise and Re-industrialise the technical manufacturing sector.

## VISION

To be leading implementation entity in Gauteng for the re-industrialisation and revitalisation of technical and engineering services specifically for SMMEs to grow into large technical manufacturing suppliers making an increasing contribution to Gauteng and South Africa's economy.

## MISSION

The mission of GTMI, in pursuit of its Vision, is to provide innovative customised solutions:

- To intervene on a micro level of re – industrialisation across the provincial township economies with the primary objective of ensuring a full implementation of the Premier's Transformation Modernisation and Re- industrialisation (TMR) programme through the development of local manufacturing capabilities to supply manufacturing industries within and outside the Gauteng Province.
- To ensure that the regional industrial base is technically diversified with a strong emphasis on the technical manufacturing industries capable of supplying the manufacturing sector and infrastructure investment activities across the province allowing the province to contribute massively to the country's productivity.

## GTMI PURPOSE:

The GTMI's staff aligns their behaviour to the shared values as listed below, these values support and are informed by the organisation's vision and mission:

- GTMI's main purpose is to radically transform, modernise and re-industrialise the technical manufacturing sector with great emphasis on the empowerment of black industrialist.
- Creating employment and opportunities for growth in the township's technical manufacturing sector.
- Optimisation of efficiency through lean manufacturing techniques.
- Mobilising industrial partners for supplier development programmes.
- Growing the economy of South Africa by increasing productivity of the technical manufacturing sector of the Gauteng province

## **Activities**

- Clustering and incubation of technical manufacturing engineering SMMEs.
- Competitive improvement through introduction of lean manufacturing techniques.
- Enterprise development.
- Supporting policy development that influences the technical manufacturing and engineering sector competitiveness.
- Lobbying for support, infrastructure and capacity that can collectively be used by the technical manufacturing and engineering sectors.

## **GTMI Strategic Programmes**

The strategic programmes at GTMI include:

### **1. Customised Enterprise & Supplier Development**

*Through our Customised Enterprise and Supplier development programme we strive to retain 5000 (in/direct) and create new jobs*

### **2. Customised sector skills development and industry placement**

*Youth growth, empowerment and job security is addressed solemnly through this programme.*

### **3. Technical Engineering Services**

*This programme is devoted to job creation and SMME empowerment in the engineering sector*

### **4. Manufacturing cluster development**

*The Manufacturing cluster development is directed to generate mass job creation with growth and equity.*

### **5. Gold Ore Lab**

*Ventures to create 200 jobs*

### **GTMI Core competencies**

- Generating expert innovative solutions to transform, modernise and re-industrialise the technical manufacturing sector.
- Maximising synergies between GTMI, AIDC and other GDED agencies
- Introducing and maintaining a culture of efficiency and optimised productivity in the technical manufacturing sector
- Accelerate technical manufacturing productive capacity through enterprise and cluster development.
